ABSTRACT

Because of the importance of reliable information regarding transfer students for regional and system-wide planning, and interinstitutional cooperation, the data gathered for this study have been organized and presented in a variety of formats designed to provide immediate answers to a wide range of questions that may be formulated regarding transfer students. The basic data are presented so as to directly relate the transfer students. The basic data are presented so as to directly relate the transfer student's prior institution and current SUNY institution and entry level. This information is provided for individual institutions, institution types, and institutions by coordinating area. Additional information is provided regarding trends in transfer students, relationship of the associate degree to transfers, admission success of transfer students, and other related information. A brief summary of some selected aspects of transfer student mobility expressed as percentages of all transfer students follows: (1) 58.0 percent from a SUNY institution to a SUNY institution; (2) 40.4 percent from a non-SUNY institution to a SUNY institution; (3) 1.6 percent previous institution unknown; (4) 63.9 percent from all sources to a SUNY senior institution; (5) 36.1 percent from all sources to a SUNY two-year institution. ## PREFACE

This is the fourth annual study of the application and enrollment patterns of University transfer students to be published by the Central Staff Office of Institutional Research. The study was conducted in response to the many requests for information regarding the inter-campus mobility of students attending institutions under the program of the State University of New York.

Because of the importance of reliable information regarding transfer students for regional and system-wide planning, and inter-institutional cooperation, the data gathered for this study have been organized and presented in a variety of formats designed to provide immediate answers to a wide range of questions which may be formulated regarding transfer students. The basic data are presented so as to directly relate the transfer student's prior institution and current SUNY institution and entry level. This information is provided for individual institutions, institution types, and institutions by coordinating area. Additional information is provided regarding trends in transfer students, relationship of the associate degree to transfers, admissions success of transfer students and other related information.

The acquisition of the data contained in this study involved a good deal of work on the part of the individual institutions. We appreciate the cooperation and effort that went into providing these data. We would particularly like to thank our professional, statistical and typing staffs whose efforts made this report possible.

Tommy Annas
Director

# INTRODUCTION

## Transfer students defined

Because of the conventional use of the term 'transfer students' and because different sources of transfer data may exist, the definition of transfer students used for this study is of special importance. Transfer students are "those undergraduate students who were enrolled at a given State University institution for the first time in the Fall 1973 term, but who had attended other colleges or universities prior to Fall 1973". Even if a student was originally enrolled at a given institution, attended elsewhere and then returned, he would be considered a transfer student. With this definition, we have transfer students moving from two-year to other two-year colleges, from senior to other senior institutions, from senior institutions to two-year colleges, as well as from two-year to senior institutions. Even if no credits were transferable, albeit an uncommon case, the student moving from one institution to another would be a transfer student.

Students coming from business schools would be considered first-time students rather than transfer students. Students who simply change majors at the same institution are not considered transfer students in this study. Graduate students transferring from other graduate programs are not included here. Therefore, the New York State Veterinary College and the State College of Optometry, which offer only graduate programs, are not included in this report.

The number of transfer students reported here is an understatement because of the difficulty some institutions have in obtaining background information on those students who are not admitted to specific degree programs by application. For example, there are 410 transfer students whose prior higher education history is unknown. There are undoubtedly many others who are not even known to be transfer students, but these are not likely to be seeking upper division status.

## Design of the study

Transfer student studies can be designed to follow identified students longitudinally, observing their success patterns. The investment of effort and time required for such studies is substantial, particularly when 72 institutions are involved. For this reason, a different approach was used in this study.

The paradigm used here was the analysis of the higher education backgrounds of transfer students enrolled in the various levels of the institutions under the program of the State University of New York. Some types of conclusions cannot flow from such a study; e.g., students who were unsuccessful in obtaining transfer acceptances anywhere in these institutions are not included even though they were formerly enrolled at one of the institutions included and may have graduated in University-parallel programs. Therefore, this study is based on an input model, not a true follow-up model.

Differences between this study and data from the Admissions Processing Center (A.P.C.)

The data from the Central Staff Admissions Processing Center (A.P.C.) does not correspond with the data of this study. The major difference is in the populations surveyed. Several institutions under the program of the State University of New York do not participate with the A.P.C. and consequently the data collected by A.P.C. is not system-wide. This report, however, includes system-wide data for all undergraduate institutions under the program of the State University of New York. The census date for the collection of data also differs. The data included in this study shows enrolled students at a specific time after classes have started and enrollments have stabilized.

Regional statistics

The articulation of transfer students is an important consideration in regional planning and cooperation among the institutions of the State University. This report includes an index of State University institutions by coordinating area. In addition, data on the educational background and placement of transfer students, undergraduate admissions and enrollment data are provided by coordinating area.

## SUMMARY OF DATA

### General Findings

A total of 25,310 transfer students were enrolled in the Fall of 1973 at State University institutions. This represents an increase of 15 percent over the Fall of 1972 and maintained the continuous growth of transfer students entering State University institutions. Of the 25,310 transfer students, 64 percent were enrolled in senior institutions and 36 percent in two-year colleges.

While the majority of transfer students originated from within the State University system (58 percent), it is interesting to note that a substantial number (40 percent) were transfer students known to come from outside of the State University system. The most common type of transfer (33 percent) was the student who transferred within the State University system from a two-year to a senior institution, and of that number, 87 percent were transfers from a community college. The next most common type of transfer (21 percent) was the student who transferred to a State University senior institution from outside of the State University system. This represents a change from the previous three years where the second most common type of transfer was the student who transferred to a two-year college from outside the State University system. During this year, this was the third most common type of transfer.

A brief summary of some selected aspects of transfer student mobility expressed as percentages of all transfer students follows:

| | | |
|---|---|---|
| From a SUNY institution to a SUNY institution | | 58.0% |
| From a non-SUNY institution to a SUNY institution | | 40.4% |
| Previous institution unknown | | 1.6% |
| From all sources to a SUNY senior institution | | 63.9% |
| From a SUNY two-year to a SUNY senior institution | 33.3% | |
| From a non-SUNY institution to a SUNY senior institution | 20.8% | |
| From a SUNY senior institution to a SUNY senior institution | 9.7% | |
| Previous institution unknown | 0.1% | |
| From all sources to a SUNY two-year institution | | 36.1% |
| From a non-SUNY institution to a SUNY two-year institution | 19.6% | |
| From a SUNY two-year to a SUNY two-year institution | 10.2% | |
| From a SUNY senior institution to a SUNY two-year institution | 4.8% | |
| Previous institution unknown | 1.5% | |

### Class levels entered

One measure of transfer student populations is the proportion of students accepted with full junior or senior standing. Students transferring from State University institutions seem to show smoother articulation than students from institutions outside the State University system, whether inside or outside

w York State. For example, 59 percent of the transfers from State University institutions admitted to senior institutions entered with junior or senior standing. Only 40 percent of those from institutions outside the State University system were accepted with junior or senior standing.

In addition to preparing students for smooth articulation to the third and fourth years of bachelor's degree programs, it is also notable that SUNY two-year colleges produced 53.6 percent of all transfers to SUNY senior institutions. The largest group of such transfers was from Community Colleges (46.5 percent) with Community Colleges under the sponsorship of the New York City Board of Higher Education producing 1.6 percent, while all other Community Colleges produced 44.9 percent. The Agricultural and Technical Colleges produced 7.1 percent of transfers to SUNY senior institutions.

In this regard, it is interesting to note that transfers to a senior institution were produced in similar percentages by other sources (see table 3A), i.e., the percent of transfers to a senior institution from a SUNY senior institution was 15.3 percent, from a non-SUNY institution within New York State, 15.9 percent, and from out of state, 15.2 percent.

Significant changes in transfer student data, Fall 1972 to Fall 1973

The total transfer population increased from 21,946 in Fall 1972 to 25,510 in Fall 1973. Despite this fact, knowledge regarding transfer students increased as those in the category of "previous institution unknown" decreased from 1,265 (or 5.8 percent of the Fall 1972 population) to 410 (or 1.6 percent of the Fall 1973 population). Eighty percent of the increase in the total transfer population can be attributed to an increase in the number of transfer students from non-SUNY institutions from 7,543 (or 34.4 percent of the Fall 1972 transfer population) to 10,229 (or 40.4 percent of the Fall 1973 transfer population).

Transfer students from a SUNY institution to a SUNY senior institution were admitted with junior class standing in about the same number of cases in 1973 and 1972 (5,930 in Fall 1972 and 5,940 in Fall 1973), but the percentage of those transfers admitted with junior class standing declined from 65.7 percent in Fall 1972 to 56.3 percent in Fall 1973. Corresponding changes in other class levels entered are as follows: freshmen, 9.2 percent in Fall 1972 to 10.5 percent in Fall 1973; sophomores, 21.3 percent in Fall 1972 to 25.7 percent in Fall 1973; seniors, 1.4 percent in Fall 1972 to 2.7 percent in Fall 1973; and those not admitted to a program from 2.5 percent in Fall 1972 to 4.7 percent in Fall 1973.

The role of the Community Colleges under the program of the State University of New York is ever increasing. Table 4 depicts the yield of transfers per associate degree. Overall, the yield has increased from .1405 in Fall 1972 to .1690 in Fall 1973. The most dramatic increase is in the category of "Other Community Colleges", those with A.A. or A.S. degrees, where the yield increased from .2473 to .3983 (or from 2326 to 3816 transfer students).

## Concluding remarks

A study of this complexity will undoubtedly raise further questions and lead to more insight about the extent and nature of inter-institutional mobility to and within the State University of New York. It is hoped that the basic information will be useful and that on the basis of these and other data, more students can find ways to further their search for appropriate and rewarding educational experiences.

[a]Excluding community colleges sponsored by the New York City Board of Higher Education. Under the Open Admission policy, students were not permitted to apply to a particular two-year or senior college under the sponsorship of the New York City Board of Higher Education. Therefore, the "applications" columns were not available campus-by-campus nor for the community colleges in the aggregate.
